## SUMMARY

Driven Computer Engineering student with hands-on experience in software development, web applications, and cloud-based tools. Proficient in C/C++, Python, JavaScript, SQL, and the MERN stack. Demonstrated project management, teamwork, and leadership skills through hackathons, internships, and event organization. Eager to deliver technology solutions in challenging environments.

## EXPERIENCE

### Participant

#### Smart India Hackathon

11/2024 - 12/2024 India

Participated in a national-level hackathon focusing on technology solutions

- Designed and implemented a technology solution for a national-level real-world problem statement.
- Developed an innovative tech solution to address a real-world problem statement
- Collaborated in a cross-functional team to build a functional prototype within tight time constraints.

### Internship

#### Intern – Python Fullstack with Cloud Computing Softmusk Info Pvt. Ltd., Belgaum

02/2024 - 03/2024 India

Softmusk Info Pvt. Ltd. is a technology solutions company specializing in software development, IT services, and training.

- Built and deployed fullstack web applications using Python-based frameworks.
- Developed and deployed full-stack web applications using Python frameworks.
- Gained hands-on experience in backend, frontend, and cloud deployment tools
- Worked on live projects and contributed to codebase improvements.

### Event Anchor and Organizer

#### College Events

01/2024 - 02/2024 College

Organized and managed events in an educational setting

- Anchored and organized major college events including Annual Day and Freshers.
- Managed logistics, event flow, and audience engagement for successful event execution.
- Organized innovative events including a Roadies-style challenge for the college fest.

## EDUCATION

### Bachelor of Engineering in Computer Engineering

#### SSPM'S COE, Kankavli

08/2022 - 05/2026 Kankavli

## PROJECTS

### Gym Management System

07/2024 - 03/2025 India

A web-based platform designed for gym management

- Developed a web-based platform for gym owners to manage members, payments, trainers, and gym information efficiently

### E-commerce Web Platform

07/2024 - 03/2025 india

Developed a full-featured E-commerce platform using the MERN stack with secure user roles, product management, and order processing.

- Successfully launched a functional and responsive shopping platform with integrated admin dashboard and payment options.
- Improved user engagement and admin control.

## SKILLS

C/C++	Python	JavaScript
SQL	HTML	CSS
React		
Node.js	MongoDB	

## INTERESTS

### Hackathons and Coding Competitions

Active participant in hackathons and coding competitions

### Event Organization

Organized a Roadies-style event for the college fest, managing challenges and participant coordination

### Sports and College Activities

Actively participated in sports and college events
